Always play in a well lit environment. Take regular breaks, 15 minutes every hour. Discontinue playing if you experience dizziness, nausea, fatigue or have a headache. Some individuals are sensitive to flashing or flickering lights or geometric shapes and patterns, may have an undetected epileptic condition and may experience epileptic seizures when watching television or playing videogames. Consult your doctor before playing videogames if you have an epileptic condition and immediately should you experience any of the following symptoms whilst playing: altered vision, muscle twitching, other involuntary movement, loss of awareness, confusion and/or convulsions.

3D HEALTH WARNING

Some people may experience discomfort (such as eye strain, eye fatigue or nausea) while watching 3D video images or playing stereoscopic 3D games on 3D televisions. If you experience such discomfort you should immediately discontinue use of your television until the discomfort subsides.

Generally we recommend that you avoid prolonged use of your PlayStation®3 system and take 15 minute breaks during each hour of play. However, when playing stereoscopic 3D games or watching 3D video, the length and frequency of necessary breaks may vary from person to person – please take breaks that are long enough to allow any feelings of discomfort to subside. If symptoms persist, consult your doctor.

The vision of young children (especially those under six years old) is still under development. We recommend that you consult with your child's doctor or optometrist before allowing young children to watch 3D video images or play stereoscopic 3D games. Adults should supervise young children to ensure they follow the recommendations listed above.

THE GAME SCREEN

1. Mini-map

The mini-map in the lower right-hand corner of the screen shows Cole's current location. Small icons and images indicate what can be found in his vicinity.

2. Karma Meter

Good and evil exist on a spectrum and as Cole performs noble or sinful actions, his karma meter will adjust accordingly. The karma meter is the red and blue semicircle in the upper right-hand corner of the screen. It is up to you to decide which path Cole follows, but remember, there will be consequences, whichever moral direction he takes...

3. Energy Meter

Cole's body is a living dynamo, and his superhuman powers will only last as long as he remains charged with electrical energy. The energy meter displays Cole's current charge level as a series of small, glowing sparks called Battery Cores. As Cole uses his powers, the Battery Cores will fade one by one. When all the Battery Cores have faded, use the Electric Drain power to recharge.

DAMAGE

As Cole takes damage, the screen fades to black and white. Blood indicators on-screen show the direction that the damage is coming from. The more the screen fades, the closer Cole is to perishing – use the Electric Drain power as soon as possible to revitalise him.

PLAYING THE GAME

POWERS

As in *Famous 2* begins, Cole is only just starting to truly understand the breadth and scope of his electric powers and over the course of the adventure he will acquire some formidable new abilities. Here are just a few of the abilities Cole can utilise during the game:

BASIC BOLT

This power allows Cole to fire bursts of electricity from his hands. A single bolt can stun enemies and civilians; several bursts can kill.

BASIC BLAST

This shockwave causes little damage, but can push humans and objects around. Use it to push enemies off of buildings, move vehicles out of Cole's way, or get some breathing space during a battle.

BASIC GRENADE

Grenades are great for confining damage to a small area. Launching grenades into a group of unsuspecting enemies is a good way to whittle down their numbers before they can attack Cole.

KINETIC PULSE

Cole can use his electric powers to lift objects off the ground. From rubbish bins to cars, he can cause objects to levitate and then throw them at will. Use the Kinetic Pulse to take away an enemy's cover or to fling vehicles at them.

IONIC POWER

With a strong sidearm swing, Cole can focus his electromagnetic powers into a tightly compressed ball. This ball triggers a localised vortex that only lasts a few seconds, but can cause massive damage over its short lifespan.

MISSIONS

STORY MISSIONS

These missions can be found by visiting the white exclamation marks on the mini-map. Sometimes several story missions may be available, so decide which one you want to undertake. All objectives must be completed in order to successfully finish a mission.

To start a story mission, look for a blue glowing cone and step into it. If Cole dies during the mission without having reached a checkpoint, you can try it again from the beginning.

SIDE MISSIONS

Yellow exclamation marks in blue or red circles represent side missions. These missions are generally given out by civilians or crooks who need Cole's help — look out for the yellow glow around their bodies.

Some people will want Cole to help them out with worthy causes; others will have darker motives... Fulfilling their requests will affect Cole's karma meter appropriately. Completing side missions unlocks territory, giving Cole a chance to clean up the local area.

Missions that give Cole a chance to earn good or bad karma will emerge randomly as he explores New Marais. These missions can range from stopping muggings to silencing protestors or preventing the police from investigating Cole's actions. Carefully choose how to act on these missions, as they will change Cole's karma level and therefore how people in the city view him.

EARNING AND SPENDING XP

Cole earns XP (experience) by beating enemies, rescuing hostages, healing injured civilians, performing side missions and completing story missions. Earning XP allows Cole to acquire new powers or upgrade his abilities.

UPGRADING POWERS

Press the  button and select Powers to access the Powers Menu. This menu explains what you need to do to unlock a new ability and lists the ability's XP cost. Certain abilities cannot be upgraded until they are unlocked and others can only be upgraded when Cole achieves a certain karma level.

KARMA

Cole's actions ultimately affect what kind of person he becomes. Protecting and helping the citizens of New Marais increases his karma rating, while acting selfishly or killing mercilessly decreases his rating. Having a good or a bad karma rating will heavily influence the way Cole's adventure pans out — the story will change depending on your choices and certain skills can only be acquired with a particular karma rating.

THE PAUSE MENU

POWERS

As Cole collects Blast Cores he gains access to new and exciting powers. Visit this menu to view Cole's equipped powers or to obtain new ones.

CREATING YOUR OWN MISSIONS

Place a mission start point and a mission success point, then move the cursor to an area in the surrounding environment and press the \otimes button to access a list of options. Choose Create Object to add different objects to your missions and Core Logic to generate the specific elements of your mission.

2. Move this cursor as you would move Cole and press the \otimes button to access a context-sensitive menu.
3. The "Budget Meter" shows the amount of available space used by the objects in your mission. Logic is usually "cheap" but some items, like people or cars, can be "expensive".

To build the best missions, choose a good location and let your imagination loose, experimenting with the different mission creation tools. Once you've created something exciting, upload it for others to play. Will you come up with a mission so good you become famous within the inFamous community?
